## WOOD 10 HALBE FRAME

The Wood 10 HALBE Frame with its narrow, square-edged profile is particularly well-suited for the smaller sizes. Wood is one of nature's best materials to provide a fitting frame for a picture. It complements the uniqueness of each and every work of art with its structure, grain, and tone. The face of the profile frame measures 1/2" inches and the thickness of the frames is 1 1/8" inches.

### Glass Types:

Glass I: Float glass, glossy, thickness 2.4mm (.09")

*Float glass is the first choice for your magnetic frames if there are no special requirements regarding the glass quality.*

Glass II: Float glass, non-reflective, thickness 2.4mm (.09")

Glass III: Plexiglas Gallery UV 100, glossy with protective film, thickness 3mm (.12")

*Gallery plexiglass is particularly shatter-proof and offers excellent protection of the picture against ultraviolet radiation. In addition, a magnetic frame with plexiglass is lighter than with float glass.*

Glass III k: Plexiglas Gallery UV 100, glossy with protective film, thickness 3mm (.12")

*Glass III k has all the characteristics of a UV-Plexiglass plus a special scratch-resistant coating.*

Glass IV: Plexiglas Gallery UV 100, antireflex, non-reflective with protective film, thickness 3mm (.12")

Glass V: Optiwhite Float glass, glossy, thickness 2.6mm (.10")

*Optiwhite is a so-called clear glass and stands for the optimal, colour-neutral rendering of the picture. The Optiwhite float glass finely frosted on one side reduces reflections while simultaneously providing excellent contour sharpness.*

Glass VI: Optiwhite Float glass, non-reflective, thickness 2.6mm (.10")

Mirogard: anti-reflective special glass, thickness 3mm (.12")

*Mirogard by Schott is regarded as the best optical-interference antireflective specialty glass and is often called the "museum glass".*

Mirogard Plus: optical interference anti-reflective special glass, with increased UV protections, thickness 3mm (.12")

Safety glass: glossy, thickness 4/25

*The safety glass panes are available as single pane safety glass or as laminated safety glass. The first choice when increased breaking and impact resistance are required or when fire protection regulations must be complied with.*

### Colors:

AN - Natural Maple	ED - Dark Alder
AW - White Maple	EH - Light Alder
EN - Natural Oak	EB - Brown Alder
ES - Black Oak	NN - Natural Chestnut

Prices are calculated based on the frame size, glass type, and color. For custom sizes, the length and width are added together, and the sum determines which custom size pricing applies. All potential custom size prices can be found by adding desired length and width, then finding the next highest custom size number.

Web conversion for dimensions is available at: <http://www.metric-conversions.org/>

**Notes**

Inlay Depth: The standard HALBE Frame can accommodate a 4-ply matboard. If a deeper inlay depth is required, be sure to specify when placing the order.  
For example: Wood 10, EH, Glass I, 400x500mm, Inlay Depth 4ply + 8ply matboard

Custom Sizes: To calculate the price for a custom format, add the height and width of the desired size and look to the next highest number in the Custom Size column.  
For example: Wood 10, EH, Glas I, Custom Size 20" x 27" inches. 20 + 27 = 47. Next highest custom size listing 47.24 - the price \$ 249.90
